

PressSense® Krystal PET P1C is a one-side corona treated polyester film with excellent adhesion to inks and superior adhesion to laminated surfaces. P1C film is a clear film with good gloss and clarity. It exhibits excellent dimensional stability and excellent surface, handling and machinability properties. P1C was specially designed for the FFS machine and exhibits eco-friendly characteristics. It is used in flexible packaging applications

Typical Properties

| Property | Unit | | | Value | | | | |
|---------------------------|------------------------------|-----|-------|-------|-------|-------|-------|-----------|
| | | | | | | | | Method |
| Thickness | Micron | | 12 | 19 | 23 | 36 | 50 | PS Method |
| | (gauge) | | 48 | 76 | 92 | 144 | 200 | |

Typical properties should be referenced as a general guide, not as a guarantee. Testing should be completed on material based on individual customer systems, efficiencies, temperatures and applications as properties can change based on customer production methods.
